CERTIFICATE IN LIEU OF OATH

I, \_\_\_\_\_ am Eighteen (18) years of age or older and do solemnly affirm and say:

I will own and exercise control over the premises located at \_\_\_\_\_ located within the Borough of Little Ferry, County of Bergen and State of New Jersey.

As of this date \_\_\_\_\_ the said premises contains no more than one dwelling unit occupied or intended to be occupied by persons living independently of each other, ie: Single Family Home.

**If this structure holds more than one dwelling unit you are to indicate the number of units, names and address of all occupants.**

**Borough Code 35-122.2 Short-term Rental Property Prohibited uses i.e., Airbnb, VRBO, etc.** (No residential premises, including dwelling houses, apartments, rooming houses or boarding houses or any parts thereof or rooms therein, except duly licensed hotels and motels, shall be rented or let for occupancy by any person or persons for a period or term of less than 180 days, notwithstanding.)

I shall notify the Construction Department of the Borough of Little Ferry in the event of a proposed rental of any portion of this single-family home, proposed conversion to two or more dwelling units. I understand and accept that failure to notify this agency upon such change will subject me to legal penalty as prescribed in the Ordinance No.(s) (1197-06-06, 1198-07-06 & 1100-08-06) of the Borough of Little Ferry Codes. I acknowledge that no area of the basement shall be used as a dwelling or sleeping area.

I hereby certify that all statements herein made by me are true and I am aware that if any of the foregoing statements made by me are willfully false, I am subject to legal action.

### **Smoke/Carbon Dioxide (CO) Detectors / Fire Door / Fire Extinguisher Requirements**

#### **1.) SMOKE DETECTORS SHALL BE LOCATED:**

- If constructed prior to 1977 - on each level of dwelling and within 10 feet of sleeping areas. Detectors may be battery powered provided they utilize a 10-year sealed battery.
- If constructed between 1977 and 1983 - 110V Smoke Detector in the basement, and within 10 feet of all sleeping rooms. No interconnection or battery back-up required; however, battery backup is strongly recommended. Battery operated smoke detection is required on all other levels and shall utilize only 10-year sealed battery detectors.
- If constructed between 1984 and 1989 - 110V Smoke Detector on each level of dwelling, and within 10 feet of all sleeping rooms. All smoke detectors shall be interconnected. Battery back-up is not required but is strongly recommended.
- If constructed between 1990 and 1992 - 110V Smoke Detector with battery back-up located on each level of the structure, inside of each sleeping room, and within 10 feet outside of sleeping rooms. All smoke detectors shall be interconnected. Battery back-up is required unless the building is fully sprinklered. Nevertheless, battery back-up is strongly recommended.
- If constructed between 1993 and 1999 - 110V Smoke Detectors with battery back-up located on each level of the structure, inside of each sleeping room, and within 10 feet outside of sleeping rooms. All smoke detectors are to be interconnected. Smoke detection is not required in bedrooms if building is fully sprinklered. Battery back-up is not required if the building is fully sprinklered. Nevertheless, battery back-up is strongly recommended.
- If constructed between 2000 and present - 110V Smoke Detectors with battery back-up located on each level of the structure, inside all sleeping rooms, and within 10 feet outside of sleeping rooms. All smoke detectors are to be interconnected. (Note: There are no battery back-up exemptions for a fully sprinklered building.)

Notes:

## *Borough of Little Ferry*

215-217 LIBERTY STREET • LITTLE FERRY, NJ 07643  
201-641-9234 201-641-1957 FAX  
[www.littleferrynj.org](http://www.littleferrynj.org)

1. All Smoke Detectors with a manufacture date greater than 10 years must be replaced.

○ **Detector Date of Manufacture (located on back of detector):** \_\_\_\_\_

- All battery-operated smoke detectors shall be of the 10-year sealed battery type.
- Smoke Detectors shall be installed securely at the highest point of the ceiling or, for level ceilings, may be installed on a wall between 4 and 12 inches below the ceiling.
- Smoke Detector operation shall be tested monthly. Backup batteries in 110V detectors shall be changed once a year to assure proper operation.

2. CARBON MONOXIDE DETECTORS SHALL BE LOCATED:

- Within 10 Feet of all sleeping areas.
- On every level of the dwelling.
- Immediately outside of any room containing a fuel-burning appliance.
- In close proximity to the entrance of an attached garage.

### Notes:

All Carbon Monoxide Detectors with a manufacture date greater than 5 years shall be replaced unless the manufacturer's literature allows for a longer period. In that case, submit the manufacturer's literature with this affidavit.

Detector Date of Manufacture (located on back of detector): \_\_\_\_\_

Carbon monoxide detection that is part of a combination smoke/carbon monoxide detector with a 10-year sealed battery is good for 10 years from date of manufacture.

3. APARTMENT ENTRY DOORS:

- All doors separating dwelling units from common hallways shall be self-closing and self-latching. Check operation by opening the door halfway and verifying that the door fully closes and latches on its own.
- Double-keyed cylinder deadbolt locks are prohibited on egress doors.

4. FIRE EXTINGUISHERS:

- One- and two- family homes and where applicable some garden-style apartment complexes shall have an approved listed-type ABC fire extinguisher with a minimum rating of 2A:10B:C within 10 feet of the kitchen.
- The extinguisher shall be mounted using the manufacturer's hanging bracket with the top of the extinguisher not more than five (5) feet above the floor and readily accessible and not obstructed.

## WHERE TO LOCATE DETECTORS:

Detectors are to be located on every level of a residence, (basement, first floor, second floor) excluding crawl spaces and unfinished attics, and in every separate sleeping area, between sleeping areas and living areas such as the kitchen, garage, basement or utility room. In homes with only one sleeping area on one floor, a detector is to be placed in the hallway outside the bedrooms as shown in: Figure 1. In single floor homes with two separate sleeping areas, two detectors are required, outside each sleeping area as shown in Figure 2. In multi-level homes, detectors are to be located outside sleeping areas and at every finished level of the homes as shown in Figure 3. Basement level detectors are to be located in close proximity to the bottom of basement stairwells as shown in Figure 4.

## WHERE NOT TO LOCATE DETECTORS

To avoid false alarms and/or improper operation, avoid installation of smoke detectors in the following areas:

- Kitchens-smoke from cooking may cause a nuisance alarm.
- Bathrooms-excessive steam from a shower may cause a nuisance alarm.
- Heat forced air ducts-used for heating or air-movement may prevent smoke from reaching detector.
- The 4-inch "Dead Air" space where the ceiling meets the wall, as shown in Figure 5.
- The peak of an "A" frame type of ceiling-"Dead Air" at the top may prevent smoke from reaching detector.

## FURTHER INFORMATION ON DETECTOR PLACEMENT:

For further information about smoke detector placement consult the National Protection Association's Standard No. 74-1984, titled "Household Fire Warning Equipment". For Carbon Monoxide alarms, their publication is Recommended Practice #720. These publications may be obtained by writing to the Publication Sales Department National Fire Protection Association, Batterymarch Park, Quincy MA 02269.

Carbon monoxide alarms are to be located in every separate sleeping area per NFPA 720 and manufacturer's recommendations.

## An Ounce of Prevention

Here are some steps you can take to protect yourself and your family:

- Have home furnaces and heating systems professionally inspected annually.
- Have the chimney and flue cleaned professionally.
- Open flues when fireplaces are in use
- Use proper fuel in kerosene space heaters.
- Make sure burner flames on furnaces and stoves are blue — not yellow-orange.
- Ensure that appliances such as gas dryers are properly vented.
- Never run an automobile in an attached garage or a gas engine in any enclosed space.
- Discourage or prohibit smoking indoors.
- Consider installing a carbon monoxide detector that meets the amended UL (Underwriters Laboratories) standard 2034, effective October 1, 1995. (Underwriters Laboratories has a set standard (UL 2034) that calls for a detector to sound the alarm before a person would experience a blood concentration of 10% carboxyhemoglobin. Cigarette smoking typically causes a level of about 9%.)

If you suffer from dizziness, nausea, fatigue, and headaches while you are home and feel better when you go out you may have CO poisoning. See a doctor and get a carboxyhemoglobin test to determine the percentage of carbon monoxide in your blood.

If you would like more information, there are several consumer hotlines established to address CO questions:

- The American Sensor's *Healthy Home* Hotline (800/387-4291)
- Local chapters of the American Lung Association (800/LUNG-USA)
- The Consumer Product Safety Commission (800/638-CPSC)

Information provided by American Sensors, the American Lung Association,  
and the national Association of Counties
